

Mathematics, Grade 8

Unit V: Lesson 3 Computer or Device: Standard Measurement Converter

Review the U.S. standard system of measurement.

Design a computer program or make a device that will change a U.S. standard measurement into its basic units.

Example: 17 oz into 1 lb 1 oz

The program or device should be useful for length, capacity, and mass.

Use the program or device to work a set of problems to illustrate how it works.
