

Mathematics, Grade 8
Unit VII: Lesson 6

Drawing: Space Age Graphics

Computers often create landscapes or three-dimensional objects by drawing lines. Look up illustrations of computer generated graphics using lines.

Using a pen or pencil, draw lines to create graphic designs illustrating at least three three-dimensional geometric shapes. Experiment with mixing various shapes to design one picture. Use paper at least 8 1/2 by 11 inches.

Title and display your graphic design.
