

Social Studies, Grade 4

Unit III: Lesson B1

Chart: **Population and Church Income**

Request church statistics for your state from your local conference office, including membership, number of churches, number of church institutions, and total dollars given in the last year for tithe and offerings. Request from the state capitol the latest population figures for the state.

Analyze your research. Using a chart, organize what you have received and make some comparisons and observations. Determine what percentage of the total population of your state is Seventh-day Adventist. How many dollars per member are given in tithes and offerings?

Share your chart in a classroom presentation.
