

Social Studies, Grade 4

Unit III: Lesson B2

Map: **Seventh-day Adventist Distribution**

From the secretary of your local church conference, request a list of cities and towns in your state where churches and church institutions are located. Study the information you receive.

Analyze and categorize your information by churches, schools, and other church-related institutions. Using three different colors of pushpins, indicate on a large map of your state where the Seventh-day Adventist churches, schools, and other institutions are located.

Display your map on a classroom bulletin board and lead out in a classroom discussion in which you analyze as a group the distribution of these three groups.
