

Social Studies, Grade 4

Unit III: Lesson B3

Role-play: **Seventh-day Adventist Jobs**

Research the different occupations that exist within church institutions in your state.

Make a list of these occupations and choose several you wish to feature in role-play. With the help of other students, produce a program for your class in which several students role-play some of the less talked about occupations in our church institutions.

Present your program for the classroom. As students role-play an occupation, they should share some specific and interesting information about the job.
